EAN13: 8427542126036

The Policharger Ksix NW-T2 single-phase 7.4 kW car charger has been manufactured and developed by Policharger, and features an intuitive installation and use to optimise the charging of the electric vehicle. The power adjustment is done automatically. It has been designed to adapt to the charging needs of any vehicle, making the most of the power available in the installation. It stands out for its durability and optimum operation both indoors and outdoors.

Includes 5m single-phase Mode 3 charging cable with Type 2 connector. Protections are not included.
